See Overlay Door Panel Preparation Instructions

**A FROST FREE 5.7 cubic foot built-in under the counter refrigerator/freezer**

## EXCLUSIVE FEATURES OF ÉCHELON™

- 1. Frost Free Technology**  
**BENEFIT:** Eliminates the need to defrost the 2075RF. The 2075RF is the only built-in under the counter refrigerator/freezer on the market which utilizes frost free technology.
- 2. Optional full overlay door capability (panel kit) using a 3/4 inch thick panel**  
**BENEFIT:** Provides a fully integrated appearance with surrounding cabinets. Overlay panel is easily attached to the door.
- 3. A large vertically designed freezer compartment**  
**BENEFIT:** A vertical freezer compartment provides more storage space and easier accessibility to the products within the freezer compartment. Tall items can now be easily stored in the freezer area.
- 4. Three fully encapsulated, contoured, spill proof shelves**  
**BENEFIT:** Upscale appearance that contains spills to one shelf. Easy to clean. The shelves consist of two half shelves located on the side of the freezer compartment and a full stylized etched bottom crisper shelf.
- 5. Two adjustable, contoured, self contained, inner door "pick-off" shelves**  
**BENEFIT:** These highly stylized shelves are adjustable for the storage of a variety of different bottle, can, and container sizes and shapes thereby providing optimum space utilization and flexibility. The self contained shelves can be removed and used to transport their contents to other cooking areas in the home or outside patio.
- 6. Bottom inner door shelf accommodates a two liter or 750 ml bottle**  
**BENEFIT:** Provides greater storage capabilities and flexibility.
- 7. Highly styled, removable, clear lower crisper drawer**  
**BENEFIT:** Optimizes the organization of product stored in the crisper. The crisper may also be used to transport its contents to a cooking or serving area.
- 8. Indented or recessed shelf channels support the encapsulated shelves**  
**BENEFIT:** Provides a sleek, clean appearance to the interior of the cabinet by eliminating protruding shelf supports. Also provides a more secure, rigid fit for the encapsulated shelves.

# EXCLUSIVE FEATURES OF ÉCHELON™

---

9. **Colder internal freezer temperatures of between -5 and +5 degrees Fahrenheit**

**BENEFIT:** A new evaporator and improved refrigeration system design plus the use of a spring loaded freezer door permits colder freezer temperatures. Such items as ice cream products and Popsicles® can now be stored and maintained within the freezer compartment.

10. **The freezer has a removable white vinyl coated wire shelf that divides the compartment in half.**

**BENEFIT:** Products can be placed underneath and on top of the wire shelf for easy storage. The shelf can also be placed on the bottom of the freezer compartment or completely removed in order to store tall items.

## SUPERIOR FEATURES OF ÉCHELON™

---

1. **Self closing door hinges are engaged when door is open approximately 8-10 inches**

**BENEFIT:** Ensures a positive door seal and prevents door bounce back.

2. **"L" shaped door hinges**

**BENEFIT:** This hinge design provides greater door support thereby permitting larger and heavier door panels and full overlay doors to be utilized.

3. **A slightly contoured, across the top, integrated door handle design for black and white units**

**BENEFIT:** The contoured shape maintains the stylized shape of the Echelon™ series plus permits full door field reversibility on black and white units.

4. **Flat, recessed, front grille with "warmer/colder" control settings**

**BENEFIT:** Greater toe kick space. Easy to read molded temperature control settings. The grille design shields the interior motor compartment and all electrical components from view.

5. **New condenser design**

**BENEFIT:** Optimizes product performance and energy efficiency while providing reductions in noise levels.

6. **New style condenser fan motor located farther away from the condenser**

**BENEFIT:** Further reduces the noise level with the utilization of the new condenser that permits the use of a lower speed condenser fan.

7. **Easier service accessibility to components if needed**

**BENEFIT:** Evaporator and evaporator fan motor are accessible from the front without removing the freezer housing. The temperature control and defrost timer are also more easily accessible.

8. **All stainless steel units have a seamless full wrap stainless steel cabinet and door with sculpted, contoured handle.**

**BENEFIT:** This seamless full wrap stainless steel door with sculpted stainless handle distinguishes the Echelon™ stainless steel units from other heavier "commercial" looks. All stainless steel units have a full wrap stainless cabinet, stainless hinges, and black grille. All stainless units must be ordered either right or left hand hinged and are not field reversible.

9. **The 2075RF stainless unit is deemed suitable for outdoor use by UL.**

**BENEFIT:** For those outdoor applications that require products that are deemed suitable for outdoor use by UL, the 2075RF stainless steel unit meets these requirements.

10. **Highest energy efficient compressor in its class**

**BENEFIT:** Reduces energy consumption.

11. **Field reversible doors (except stainless steel).**

**BENEFIT:** Greater flexibility where the unit can be installed and allows for side-by-side applications.

## ADDITIONAL FEATURES

---

1. Approximately 4.2 cubic feet of refrigeration and 1.5 cubic feet of freezer.
2. Built-in or freestanding.
3. All doors (except stainless steel) accommodate a 1/4 inch thick custom panel. All doors come standard with a factory installed black or white flush panel.
4. Door locks optional on black and white units. Not available on stainless steel.
5. Interior light.
6. Vinyl clad steel cabinet (black/white).
7. Adjustable leveling legs.
8. Available in black, white, stainless steel.

## BENEFITS

---

Provides both refrigeration and freezer capacity.

Provides custom look. No additional clearance around sides, top, or rear for ventilation. **Do not obstruct front grille.**

Standard feature to achieve a custom, built-in look by matching surrounding cabinets.

Door remain field reversible. Locks located in upper middle portion of the door.

Automatically illuminates when door opens.

Textured rich look. More resistant to scratching, peeling, flaking. Cabinet sides extend to the floor.

More precise under the counter fit, durable – factory installed.

Blends with all cabinet colors.
