**U-Line Showcases Premium Marine Models at the 2015
International BoatBuilders' Exhibition and Conference (IBEX)**

August 12, 2015 (Milwaukee, WI) – U-Line, the American market leader in premium modular ice making, refrigeration and wine preservation products, will showcase its premium Marine Series & Marine Capable Models at IBEX 2015. U-Line will be located in booth #2712 and the show will be held September 15 - 17, 2015, at the Kentucky Exposition Center.

“U-Line, which has served the marine market for over 50 years, offers boatbuilders reliable functionality and flexibility by providing modular refrigeration solutions that seamlessly integrate into various locations above and below deck,” states Mark Russell, Vice President of Sales and Marketing for U-Line. “Boatbuilders and designers can choose Crescent Ice Makers and Combo® Models from our Marine Series that are specifically designed for the marine environment. Additionally, we are very eager to introduce our Marine Capable models; an array of Modular 3000 Series and 2000 Series models that can be installed in climate controlled environments below deck, further expanding our installation options.”

The Marine Series consists of five Crescent Ice Maker models and one refrigerator/ice maker Combo® Model. All models feature corrosion and UV resistant components, providing product longevity in harsh environments, in addition to our standard travel package door latch, ensuring safe-at-sea storage. Marine Series models can store up to 12-25 lb. of ice, and many models use less than three gallons of water to produce up to 23 lb. of ice per day. Units are designed to be built-in or can be freestanding with no drain required.

About IBEX

IBEX is owned and produced by Professional BoatBuilder magazine and National Marine Manufacturers Association (NMMA). This Trade focused show features more than 500 marine-industry suppliers displaying the latest in boatbuilding products and technology. IBEX also presents more than 55 educational seminars, plus exhibitor workshops and demonstrations. The world's leading technical boatbuilding showcase, IBEX delivers a unique forum where the marine industry can do business, share ideas, and accelerate new product development.
